Advance Directives

An “Advance Directive” is a general term that refers to your instructions about your medical care in the event you become unable to voice these instructions yourself. Each state regulates advance directives differently. STATE laws regarding Advanced Directives are found in New Jersey Statutes § 26:2H-53 through 78. In the state of New Jersey, all patients have the right to decide what medical treatment they want or do not want to receive. They can decide in advance what treatment they would want, and put that decision in writing, or they may name someone else who understands and shares their values, to exercise that right for them. Under New Jersey Law, there are three kinds of Advance Directives: Proxy, Instruction Directive (“Living Will”) or Combined Directive. http://www.state.nj.us/health/advancedirective/documents/njsa_26.2h.53.pdf

You have the right to informed decision making regarding your care, including information regarding Advance Directives and this facility’s policy on Advance Directives. Applicable state forms will also be provided upon request. A member of our staff will be discussing Advance Directives with the patient (and/or patient’s representative) prior to the procedure being performed. Patients are asked to bring copies of their Advance Directives with them to the surgery center.

The Center for Ambulatory Surgery respects the right of patients to make informed decisions regarding their care. The Center has adopted the position that an ambulatory surgery center setting is not the most appropriate setting for end of life decisions. Therefore, it is the policy of this surgery center that in the absence of an applicable properly executed Advance Directive, if there is deterioration in the patient’s condition during treatment at the surgery center, the personnel at the center will initiate resuscitative or other stabilizing measures. The patient will be transferred to an acute care hospital, where further treatment decisions will be made.

If the patient has Advance Directives which have been provided to the surgery center that impact resuscitative measures being taken, we will discuss the treatment plan with the patient and his/her physician to determine the appropriate course of action to be taken regarding the patient’s care.

Complaints/Grievances:

If you believe the care provided to you in a hospital by a doctor was improper, you may file a complaint with the Board of Medical Examiners. However, because the regulation of hospitals is under the jurisdiction of the New Jersey Department of Health and Senior Services (DHSS), if you believe you received improper care at a hospital, you should contact the DHSS Complaint section at (800) 792-9770.
